Applications

In supermarket check-out

Like "checkout" scales: DPOS series scales can be connected to POS or ECRs, sending the information of the weighed items required to be shown in the receipt.

The design facilitates its integration in supermarket check-out desk.

In supermarket self-service section

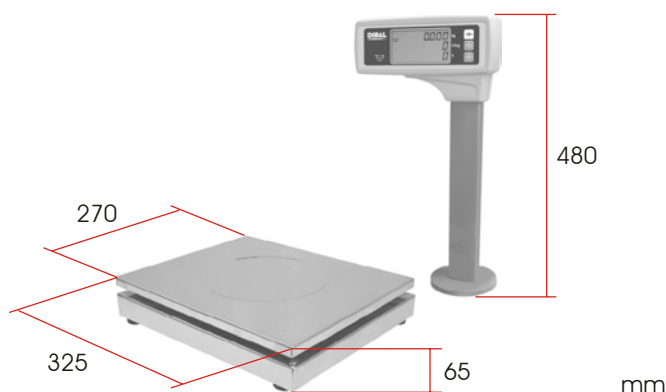

For weight verification by clients in self-service sections of the supermarket.

In food industry

Used as "weight only" scales for batch preparation, manual dosage, weight control of ingredients, etc.

Dimensions

Characteristics

Capacity / Accuracy

6 kg - 2 g, 15 kg - 5 g or 30 kg - 10 g.
Optional multirange: 6/15 kg, 15/30 kg.

Communications

RS-232 interface.
Data transmission is done through communication protocols, available for the most important POS / ECR models and manufacturers.

Weighing plate

Stainless steel AISI 304. 325 x 270 mm.

Memory

"Flash" type memory: it allows the update of the software straight from the PC without opening or unsealing the scale.

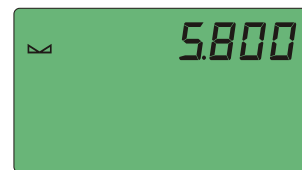

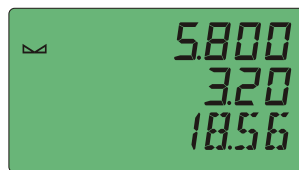

Display

D-POS scales include a backlight LCD display, separated from the plate.

The column has a circular base to allow the display orientation and to facilitate its reading.

Selectable by user, the display can show weight, price and amount (received from the POS or ECR) or just the product weight.

Number of digits: Weight (5), Price (5), Amount (6).

D-POS Scales are available in 2 versions: with one display or with double display (vendor and purchaser).
